

Silvio Emanuel de Oliveira Félix

Full-Stack Developer

PERSONAL INFORMATION

Age: 29 years old

City: Pedro Teixeira

State: Minas Gerais

Phone: (28) 9 99900-2593

Email: silvio.felix32@hotmail.com

PROFESSIONAL PROFILE

To work as a Full-Stack Developer, leveraging my experience in frontend and backend to create efficient and scalable solutions, always focusing on solid software architecture, development best practices, and testing.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Analyst at: Natura

Outsourced through SysMap Solutions

- Employment period: 12/2023 – Present.
- Acting as a Senior Full-Stack Engineer in a large-scale replatforming initiative, modernizing Natura's legacy Java ecosystem into a modern JavaScript/TypeScript architecture. Collaborating across multiple business domains to deliver scalable, high-performance solutions, ensuring compatibility with legacy systems during the migration.
- Development and maintenance of distributed backend services with Java, JavaScript, TypeScript, Node.js (Express.js, NestJS), Spring Boot, GraphQL and REST APIs, following Clean Architecture, DDD, SOLID and microservices architecture.
- Participation in the end-to-end development of Natura's digital commerce platform, delivering features in authentication, storefront, product catalog, availability, cart, order management, delivery and delivery forecasting.
- Design, implementation and integration of secure authentication and authorization solutions with Amazon Cognito, Oracle Access Manager (OAM), OAuth2 and OpenID Connect (OIDC).
- Building and maintaining cloud-native solutions on AWS, using Lambda, API Gateway, S3 and Cognito, with Docker, Kubernetes, Redis and scalable distributed architectures.
- Development and maintenance of applications with Spring Boot, Express.js, NestJS, TypeORM, JPA, JDBC, Zod, Maven, JVM, JDK, NPM and Yarn.
- Work with relational and NoSQL databases, including PostgreSQL, MySQL, Oracle Database, ScyllaDB and DynamoDB, with efficient modeling and performance optimization.
- Ensuring software quality through automated testing using JUnit 5, Mockito, Jest, Mocha and Chai, contributing to code reviews, technical documentation and continuous quality improvements.
- Building and maintaining CI/CD pipelines with GitHub Actions and Jenkins, managing source code with Git, GitHub and Bitbucket.
- Monitoring production environments with Kibana, Grafana and SonarQube, supporting performance analysis, observability and application reliability.
- Contributing to frontend work with React.js, Next.js, HTML5, CSS3 and Styled-components when needed in cross-functional development.
- Collaboration in agile teams using Scrum, participating in Sprint Planning, Daily Meetings, Sprint Reviews and Retrospectives, documenting technical decisions in Jira and Confluence.

- Use of Cursor AI and advanced prompt engineering techniques to accelerate development, code review, refactoring, automated documentation and test generation.

Technologies: Java | JavaScript | TypeScript | C | Python | PHP | HTML5 | CSS3 | React.js | Next.js | Styled-components | Node.js | Express.js | NestJS | Spring Boot | GraphQL | REST APIs | TypeORM | JPA | JDBC | Maven | JVM | JDK | NPM | Yarn | JUnit 5 | Mockito | Jest | Mocha | Chai | Integration Testing | PostgreSQL | MySQL | OracleDB | ScyllaDB | DynamoDB | Redis | Docker | Kubernetes | AWS | AWS Lambda | API Gateway | Amazon S3 | Amazon Cognito | Oracle Access Manager (OAM) | OAuth2 | OpenID Connect (OIDC) | Git | GitHub | Bitbucket | GitHub Actions | Jenkins | Kibana | Grafana | SonarQube | Jira | Confluence | Clean Architecture | Clean Code | SOLID | Design Patterns | Domain-Driven Design (DDD) | Microservices | Scrum | Kanban | Cursor AI | Prompt Engineering | AI-assisted Software Development | Code Generation | Code Review | Refactoring | Unit Test Generation | Technical Documentation

Full-Stack Developer - Freelance

- Worked as a Full-Stack Developer Analyst on an e-commerce project. On the frontend, used React and Styled-Components. On the backend, developed and maintained a robust API to manage a large volume of product registrations, using Node.js, Nest.js and Jest for unit testing. Also worked with Docker for container orchestration, plus PostgreSQL databases. Authentication was implemented using AWS Cognito.

Technologies: Full-Stack Developer | TypeScript | React.js | Styled Components | Node.js | Nest.js | Jest | Docker | PostgreSQL | AWS Cognito

Full-Stack Developer Analyst at: Natura

Outsourced through SysMap Solutions

- Employment period: 03/2022 – 06/2022.
- Acted as a Full-Stack Developer on the team responsible for the user profile registration and management platform, developing high-availability services and interfaces that supported Natura's entire digital ecosystem.
- Development and maintenance of high-volume backend services with Node.js and Express.js, implementing scalable REST APIs and microservices for registration, profile updates and account management.
- Design and implementation of event-driven flows with AWS Lambda and asynchronous messaging to process registration and profile-update events in distributed systems.
- Contributed to the frontend of registration and profile-management applications with React.js, TypeScript and Styled-components, delivering responsive and intuitive experiences.
- Integration between frontend and backend services, ensuring secure, reliable and consistent user data across multiple business domains.
- Application of Clean Code, Clean Architecture and SOLID principles to build maintainable, scalable applications.
- Development of automated unit tests with Mocha and Chai, improving software quality and reducing production defects.
- Work with Docker and Kubernetes for containerized deployments and application orchestration.
- Management and optimization of relational databases PostgreSQL and MySQL, supporting high-volume transactional workloads.
- Collaboration in agile teams throughout the development cycle, participating in architecture discussions, code reviews and continuous delivery initiatives.

Technologies: Node.js | Express.js | React.js | TypeScript | Styled-components | REST APIs | Microservices | AWS Lambda | Event-Driven Architecture | Docker | Kubernetes | PostgreSQL | MySQL | Mocha | Chai | Clean Architecture | SOLID

Full-Stack Developer at: Uni System Automação e Tecnologia

- Employment period: 11/2021 – 02/2022.
- Designed and developed a complete e-commerce platform for a water park from the ground up, delivering an end-to-end solution covering customer experience, administration, backend services and business operations.
- Full frontend architecture and development with Next.js, React.js and TypeScript, following Clean Architecture, Clean Code and SOLID principles.
- Built a fully responsive, mobile-first interface with SASS, reusable components and responsive design techniques, ensuring an optimized experience across desktop, tablet and mobile.
- Developed the complete customer journey, including ticket browsing, date selection, authentication, cart, checkout and order completion.
- Integrated authentication and authorization with Keycloak, implementing secure login and user session management.
- Designed and implemented the admin portal, enabling product and ticket creation, price management, stock updates and operational administration.
- Developed backend services with NestJS and Node.js, implementing REST APIs for user management, authentication, products, tickets, cart, orders and sales flows.

- Designed and integrated frontend-backend communication, ensuring data consistency and a seamless experience across the platform.
- Implemented automated unit tests and maintained high code quality with modular architecture, reusable components and software engineering best practices.
- Collaborated across the entire software lifecycle, from requirements analysis and architecture definition to implementation, testing and production deployment.

Technologies: *Next.js* | *React.js* | *TypeScript* | *NestJS* | *Node.js* | *SASS* | *Keycloak* | *REST APIs* | *Clean Architecture* | *Clean Code* | *SOLID* | *Unit Testing*

Full-Stack Developer - Freelance

- Period: Feb 2021 – Nov 2021.
- Worked on frontend projects building responsive components and pages using React.js and TypeScript. On the backend, worked with Node.js and Express to implement clean architectures.

TECHNICAL SKILLS

- Languages: Java, JavaScript, TypeScript
- Languages with academic knowledge: C, Python, PHP
- Web: HTML, CSS, React.js, Next.js
- Backend: Node.js, Express.js, NestJS, Spring Boot
- Development: REST APIs, GraphQL
- Architecture & Best Practices: Clean Architecture, Clean Code, SOLID, Design Patterns, Domain-Driven Design (DDD), Microservices, Event-Driven Architecture
- Build & Runtime: Maven, JVM, JDK, NPM, Yarn
- Testing: JUnit 5, Mockito, Jest, Mocha, Chai, Unit Testing, Integration Testing
- Persistence: JPA, JDBC, TypeORM, PrismaORM
- Version Control: Git, GitHub, Bitbucket
- Databases: PostgreSQL, MySQL, OracleDB, ScyllaDB, MongoDB, DynamoDB, SQL
- Collaboration Tools: Bitbucket, Jira, Confluence
- Agile Methodologies: Scrum, Kanban
- Cache: Redis
- Styling: Styled-components, Sass, Tailwind CSS
- Containers: Docker, Kubernetes
- Authentication: Keycloak, Cognito, OAM (OIDC, OAuth2)
- Monitoring Tools (hands-on use): Kibana, Grafana, SonarQube
- Cloud Services: AWS, AWS Lambda, API Gateway, Amazon S3, Amazon Cognito
- CI/CD: GitHub Actions, Jenkins (pipeline usage and configuration)
- AI-Assisted Development: Cursor AI, Prompt Engineering, AI-assisted Software Development, Code Generation, Code Review, Refactoring, Unit Test Generation, Technical Documentation Generation

LICENSES AND CERTIFICATIONS

- Technology Degree (CST), Software Engineering – Estácio – In Progress
- AI for Devs – How Developers Can Get the Most Out of AI – Udemy
- Functional and Reactive JavaScript – Udemy
- AI Literacy – Triggo.AI
- AWS Lambda & Serverless – Developer Guide with Hands-on Labs – Udemy
- Java Course – Rocketseat
- Docker for Developers (with Docker Swarm and Kubernetes) – Udemy
- TypeScript from Basics to Advanced (w/ React, Express) – Udemy
- Node.js Microservices: NestJS, RabbitMQ and Cloud Services – Udemy
- Modern Complete Web Course with JavaScript + Projects – Udemy
